

Latvian summary.

The activities of the 3rd term.

Till the 4th meeting in Poland we have:

- Informed our new students and teachers about Comenius project;
- Communicated regularly with teachers from other partner schools through e-mail;
- Had 2 „Comenius club” meetings every month;
- Students created personal e-mails and communicated with the students in Turkey.

Not all the students communicated regularly, but anyway this activity is very interesting for students and I am sure that some of them will continue it for a long time and may be it will lead to the real friendship some day.

- Smaller students had a project day- „I and my friend at school” where one of the activities was to create a picture for exchanging drawings with Turkish students.

Children are very eager to talk about this topic because friends are very important people for everyone. They liked drawing even more this time because they had a possibility to share their ideas with the children in another country.
